Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Bolen, Jr. et al. US 4,993,606.

Bolen '606 teaches a container body (not shown; reference teaches threads 22 would mate to a container in column 4, lines 20-25 using threads or any other means), a lid (12), a cover (14) which is capable of being replaceably applied to the lid (via the snap of projections 46 and indents 34), a first groove (25) recessed from an outer surface (18), an engaging portion in the first groove (read to be the bottom corner edge of 25), a resilient engageable portion (39) on the replacement cover which engages the engaging portion, a second groove (read to be the disc-shaped void created inbetween the vertically - extending annular flange which is unlabeled, but best seen in figure 6, extending downwardly from the lower surface of the cap top wall, underneath element 31 and underneath element 26) disposed on the inner surface of the lid in communication with the first groove, and which is configured to allow an operating force to deform and disengage the engageable portion, and where the lid is configured to cover over the opening of the second groove with the container body in a closed position (such as when the cap is threaded to the container neck), and expose the second groove when the lid is opened (such as when the cap is unscrewed from the container mouth).

Allowable Subject Matter

3. Claim 1 is allowed upon filing of a terminal disclaimer.

Response to Arguments

4. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
